5'S and Safety

We have to constantly be on the lookout for safety issues. That can be difficult when we work in an area for a long time. When ever you can, have someone from another area look over your area. Have a safety committee audit different areas of your facility.

Find innovative ways to eliminate your safety issues, no matter how minor they may seem. Operator ideas, no matter how small, will lead to bigger and better ideas, that will have a major impact on your facility.
